

THE POCHE DAILY RECORD.

THURSDAY, OCTOBER 19, 1876

Carrie Cary, fifteen years old, living at Great Bend, Pennsylvania, engaged to be married, went with a gentleman friend to have her picture taken. Gentleman friend showed the picture around and said it was his intended. Female friend told Carrie that if her betrothed heard of it he would not marry her. Poor Carrie believed it, and at twelve o'clock that night stole out to the great woods and hung herself. Female friend ought to be hung too, or nearly.

We clip the following from the "Personal" column of the San Francisco Chronicle:

A man found dead on the desert between Borax Lake and Panamint, Inyo county, Cal., by name Peter Slater, formerly of Empire City, Nevada; anyone identifying him may hear of something to their advantage by addressing Green, Cohn & Co., Mojave, Kern county, Cal. Some one in this section may know something about the poor fellow.

The Boston Herald gives us a fresh scare by remarking "this country will wake up some morning and find it has no President and no way of getting any. If Grant and Ferry should die there is no Speaker of the House to succeed them, and there can't be any until December. This is a piece of neglect which ought to have been remedied long ago."

It is thought that the Forrest Home, recently opened in Philadelphia as an asylum for indigent actors, will have but few inmates. An actor disdains charity, however delicately disposed, and very few will be found desirous to avail themselves of the generosity of the great delineator of human nature.

And so Sitting Bull wants to come and get some ammunition. He will, no doubt, return it at the first convenient opportunity. His request should be granted; it would argue no more folly than the usual actions of the Indian Department do.

It is said that the Chinese use apes to gather tea in their tea-gardens. Well, so it goes; we use the Chinese, the Chinese use apes; the apes in their native wilds possibly use some inferior animals to bring in the nuts, &c., and so on down.

In Brazil one can not commence a law suit until he has appeared with his adversary before a magistrate and tried to make a friendly settlement. Bad for the Brazilian lawyers, but when they do get an orange of a client they squeeze him dry.

Charley Rosa's father's book reads like a romance. He traveled hundreds of thousands of miles, and spent his entire fortune looking for the poor little fellow, who in all probability, will never more be seen by mortal eyes.

Dierrell, now Lord Beaconsfield, says that all Europe is honey-combed with secret societies. London, Berlin and St. Petersburg are their headquarters; they are all political, and their power is tremendous.

The famous Tibborno claimant, about whom all England went wild a few years ago, is confined in Darroon Prison. He runs a sewing machine all day, and measures seventeen inches less in girth than when he went in.

In 1872 at the October election in Indiana, the Democratic majority was 1,148. At the ensuing election the Hoosiers chopped considerably and gave Grant 31,000 majority over Greeley.

The Liberal Convention of Utah has nominated Robert N. Baskin for Congressional Delegate, against the Church nominee, George Q. Cannon.

The attempt to identify Governor Hayes with the American Alliance has thus far proved a failure. He isn't that kind of a man.

Tweed will arrive in New York just in time to celebrate the first anniversary of his escape from Ludlow street jail.

Italian printers get twelve cents per thousand ems for setting type. Nevada printers get seventy-five cents for ditto.

The mining interests of California are receiving renewed attention throughout the State.

Three million dollars worth of salmon are annually taken out of the Columbia River.

"We've got 'em," says the Virginia Enterprise. How long have you had 'em?

Eureka expects to register 1,350 voters. Good for Eureka.

Four thousand five hundred voters are registered in Virginia City.

Our European dispatches this morning indicate the probable commencement of hostilities between the Czar and Porte. Diplomacy seems to be at an end, and now war comes to the front.

At last we have some definite news from Indiana. In our dispatches this morning are the Congressional official majorities.

SPIRIT OF THE PRESS.

In the Eureka District Court recently, Judge Cole decided that a garnishment service would not hold against a county.

A Mormon Church, with a large membership, has been established in Townsda, Wayne county, New York.

They have a tree on the North Tule river, 48 miles from Visalia, California, which measures in circumference 108 feet.

An old man named Bernard Kelley committed suicide at Garrity's lodging house, D street, on the 13th, by taking sulphuric acid.

The Beaver Enterprise says: The St. George Temple will be completed by the 6th of April, 1877, at which time the General Church Conference will be held.

The largest shoe manufactory on the Pacific Coast has lately discharged all its Chinese help, and employed 300 white men, women and boys, finding them more profitable. That is the true way to settle the Chinese problem.

Shipments of copper ore from Butte City, Montana, are averaging from 15 to 20 tons per week. The ore comes mainly from the Mountain and Parrott lodes, and goes to Pope, Cole & Co., of Baltimore. The ore mills between 60 and 60 per cent.

The population of California is 900,000. Since 1848 the Pacific Coast has produced gold, silver and merchandise valued at \$412,000,000. The population of this vast territory is placed at 1,500,000, and this year the produce is placed at \$293,100,000. The population of San Francisco in 1837 was 100; now it is 275,000, with 47 daily and weekly newspapers.

The real bonanza of Eastern Idaho is said to be the Jordan mine, twenty miles from Loom Creek. It is a gold and silver bearing vein and is rich. Wm. A. Norton, owner of the Jordan mine, sacks and packs his quartz to Salmon City, a distance of 120 miles, and thence by wagon to the railroad, and he makes money out of his quartz.

A large holder of the Con. Virginia stock tells a S. F. Post reporter "the people don't seem to understand why Consolidated Virginia is producing less bullion, and what is the real cause of the trouble about the dividends. To my own knowledge, as a stockholder, the bullion produced at this mine for the last six months has never been sold, but shipped to London, where it is now awaiting a rise in the price of silver. Flood & O'Brien have loaned to the company their twenty-dollar pieces to pay dividends, withholding this accumulation of bullion as collateral."

THE CAMPAIGN IN NEW YORK.—But for an occasional banner or transparency we should hardly know that we are in the midst of a Presidential campaign. And, if the candidates look anything like their pictures, I should hope for their common defeat. That of good old Peter Cooper on Fourteenth street is the worst of all; if he had a particle of vanity he would replace it at his own cost. Governor Hayes looks like a bruiser with a mashed and sodden face; Governor Tilden, with a grotesquely exaggerated droop in his left eye and under lip, leans in a fashion which would be licentious if it were not idiotic; while Wheeler and Hendricks are not to be distinguished from each other. In society and at the clubs, Republicans and Democrats discuss the situation with a candor and an absence of animosity which are amazing, when one remembers past contests. This implies no lack of earnest conviction; it simply shows that our political life is at last becoming a little more wise and humane.—[Bayard Taylor to Cincinnati Commercial.]

CABLEING ACROSS THE ATLANTIC.—How long does it take to transmit a message through the Atlantic cable? The New York Journal of Commerce has been investigating this question, and, simple as it looks at first sight, there are many singular and interesting points in the answer. When the electricity is applied to the cable at one end, two tenths of a second pass before any effect is felt at the other end, and three seconds are consumed before the full force of the current is in action. The first signal is felt in four-tenths of a second, but the following ones go through more rapidly. As many as seventeen words have been sent over the Atlantic cable in one minute; fifteen can usually be sent under pressure, and twelve words a minute is a good working rate. Messages of twelve words have been sent all the way from New York to London in two minutes. A fact not yet explained by the scientists, is that the electricity does not move as rapidly from New York to London as in the opposite direction.
